

Introduction to Prototyping

Ye Kyaw Thu

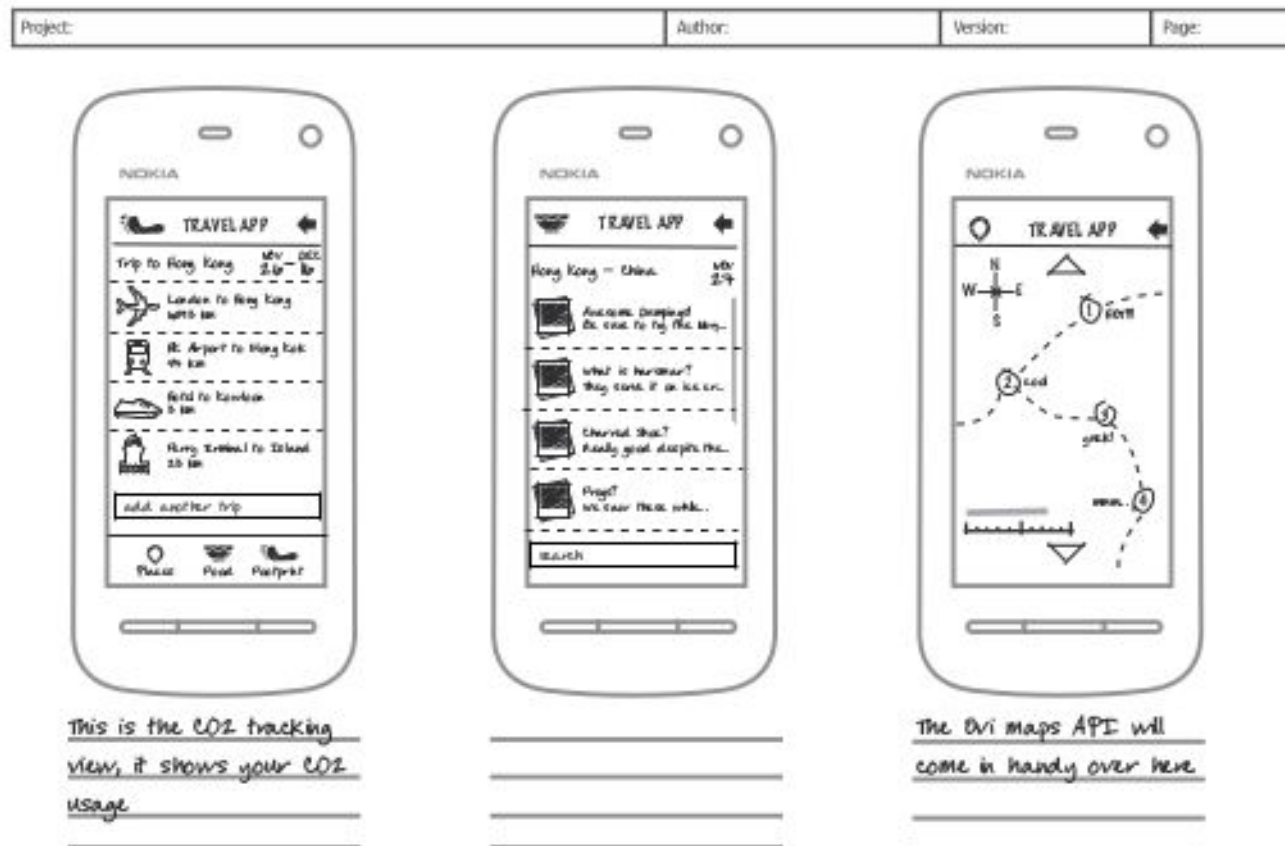

(HP: <https://sites.google.com/site/yekyawthunlp/>)

Deep Learning Summer Schools, 2018
Myanmar

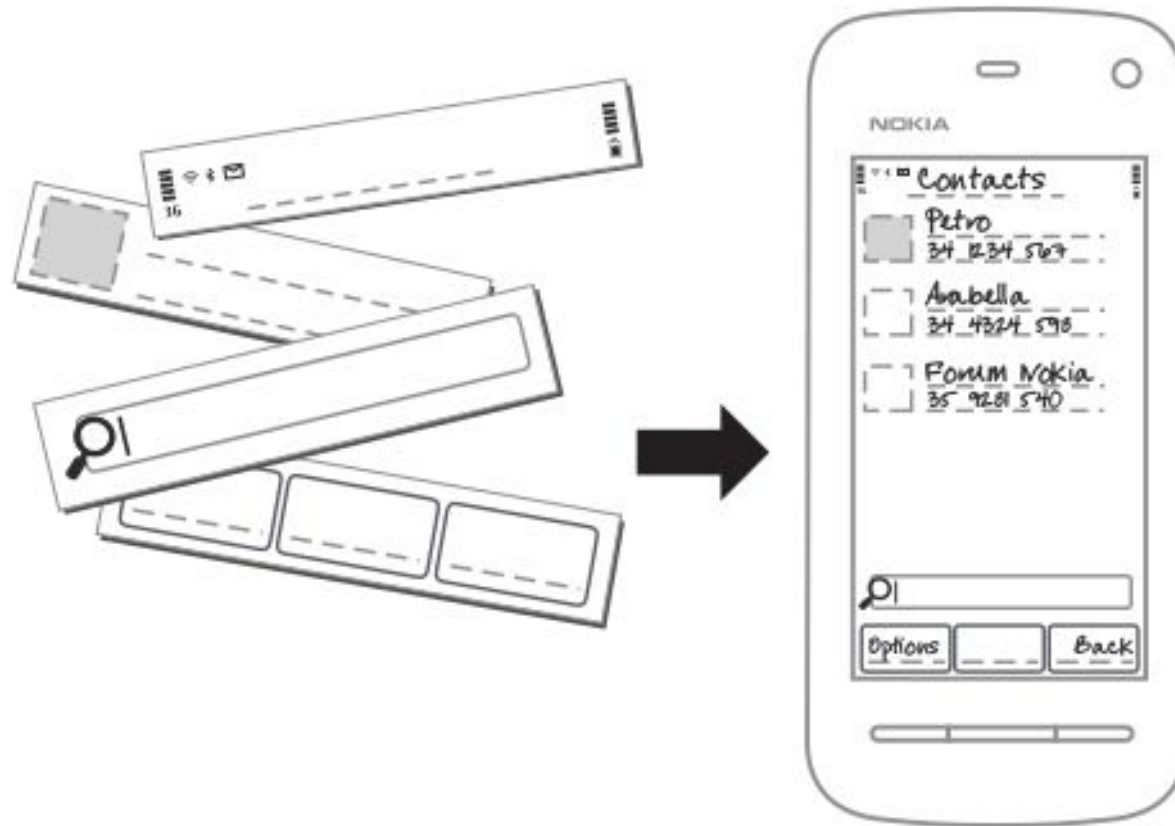

Table of Content

- Wireframes & Paper Prototyping
- GUI Prototypes for Your Models
- Practical Introduction to yad & PyQt

Wireframes & Paper Prototyping

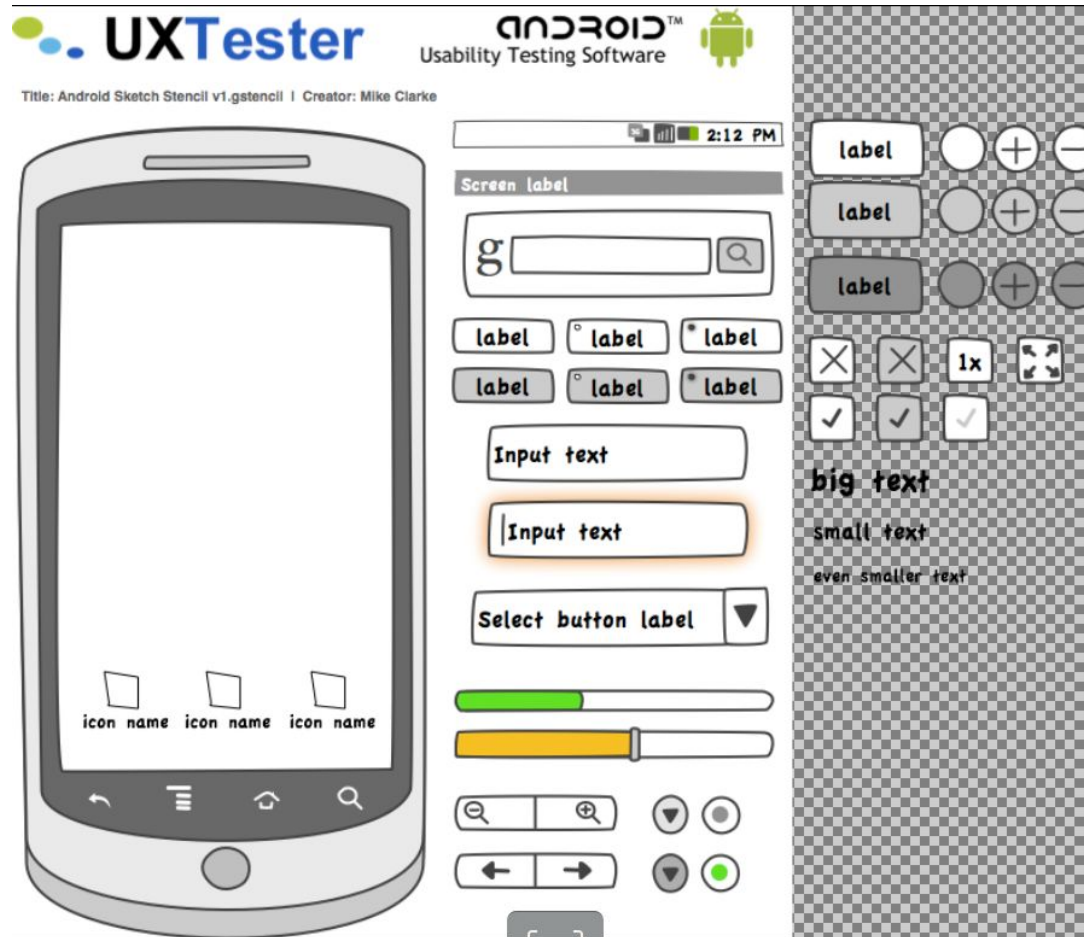

Wireframes & Paper Prototyping

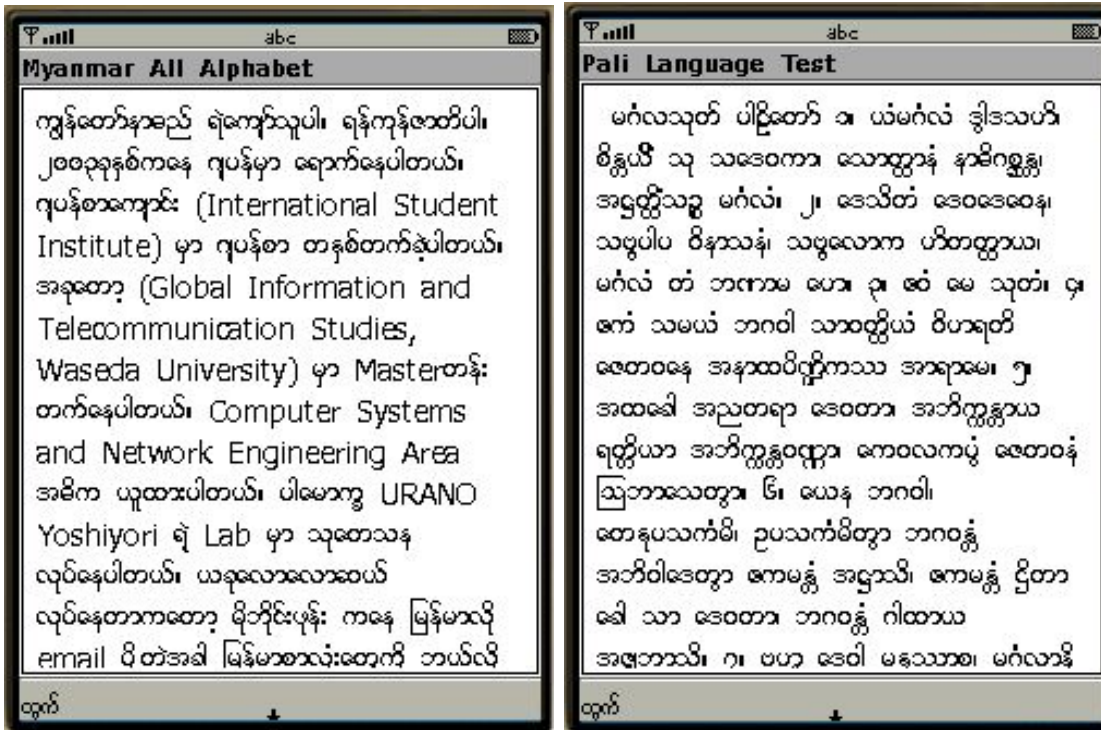

- After prepared wireframes, we can also make paper prototyping

Wireframes & Paper Prototyping

- Sometimes, you have to draw/create by yourself

Wireframes & Paper Prototyping

- An example of using mobile device emulator software

Wireframes & Paper Prototyping

- User-study with a mobile devices in Yangon

Wireframes & Paper Prototyping

- Setup well for your user study environment

Wireframes & Paper Prototyping

- `home/lar/ss2018/prototype/video/Cell_Phone_05_06.mov`

GUI Prototypes for Your Models

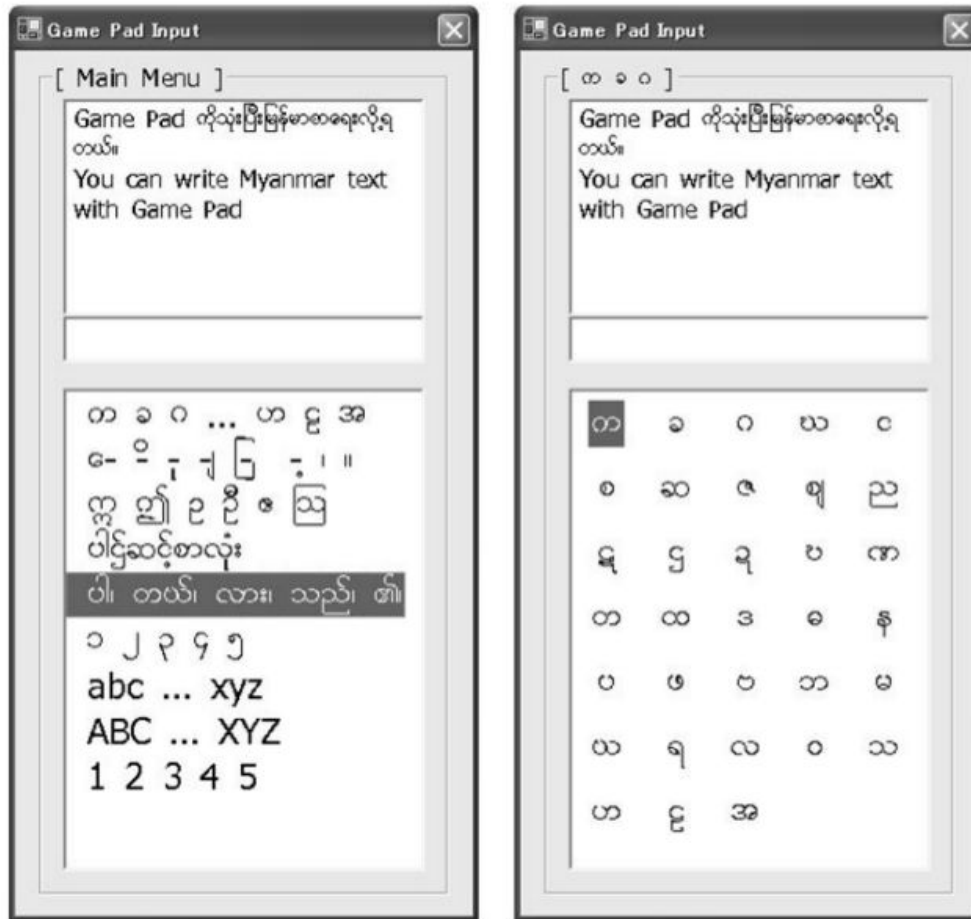

- SELECTION
BASED
MYANMAR TEXT
INPUT
INTERFACES:

- (Proposal of
Dividing All
Myanmar
Characters into 6
Groups)

- I proposed at
IASTED-2007

GUI Prototypes for Your Models

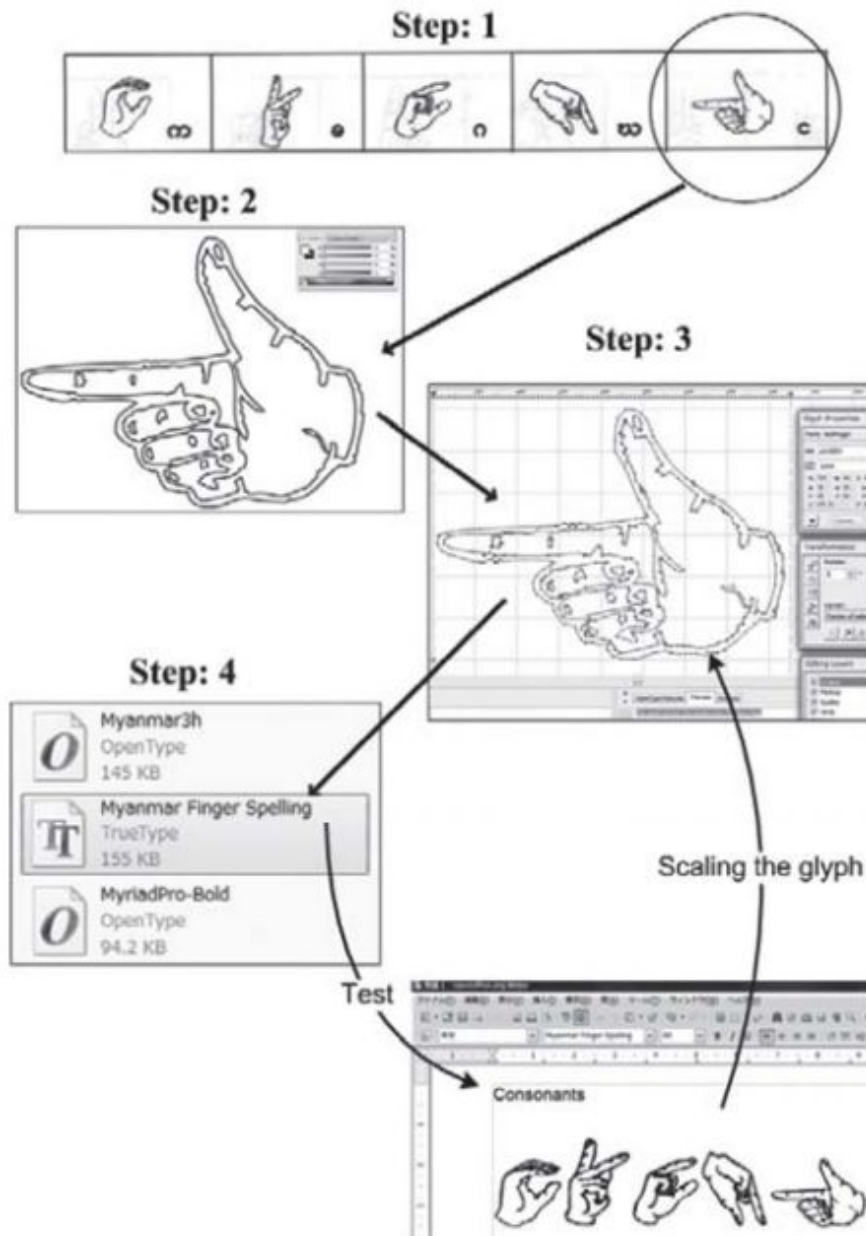

- Fig. UI for 4 Arrow Keys with 2/3 buttons

GUI Prototypes for Your Models

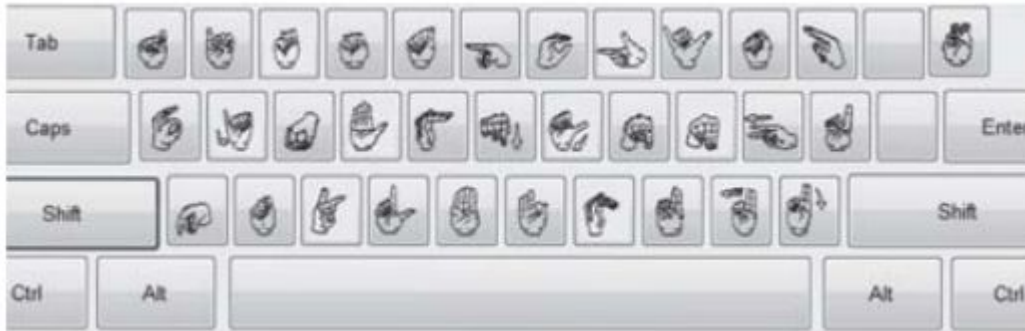

- Fig. UI for Apple iPod MP3 Player

GUI Prototypes for Your Models

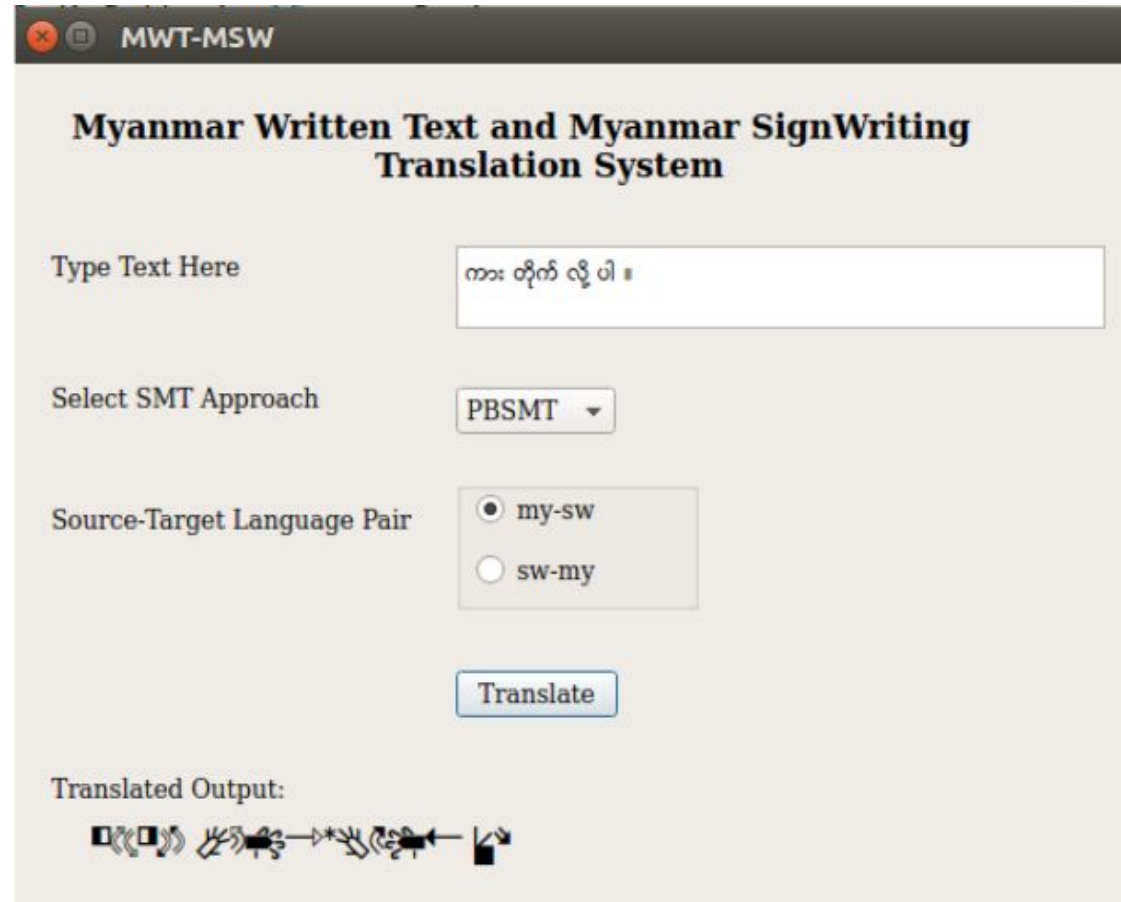

- Step 1: Scanning (600dpi)
- Step 2: Trace each fingerspelling character and then convert to vector format
- Step 3: Adjust fingerspelling character path with FontLab Studio
- Step 4: Generate TTF & testing

GUI Prototypes for your models

- Direct Keyboard Mapping (DKM) software
keyboard prototype and user-study photo

GUI Prototypes for Your Models

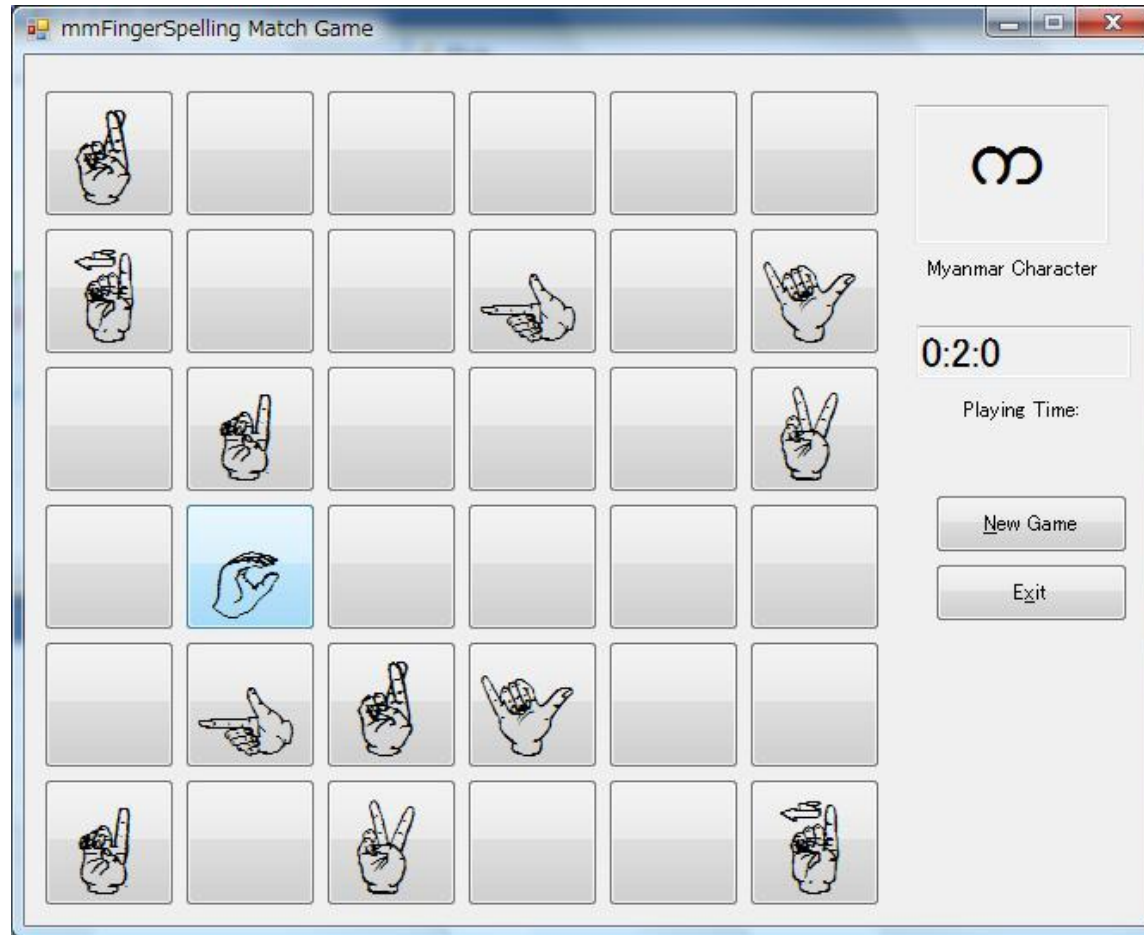

- GUI for Statistical Machine Translation Demo
- (Hnin Wai Wai Hlaing et. al., ASEAN-AI 2018)

GUI Prototypes for Your Models

- Phonetic based keyboard layout for Myanmar SignWriting
- (Proposed by Hlaing Myat Nwe et. al., ICCA2018)
- Link:

GUI Prototypes for Your Models

- Matching Game GUI for Myanmar fingerspelling
- (It might be useful for Fingerspelling education)

GUI Prototypes for Your Models

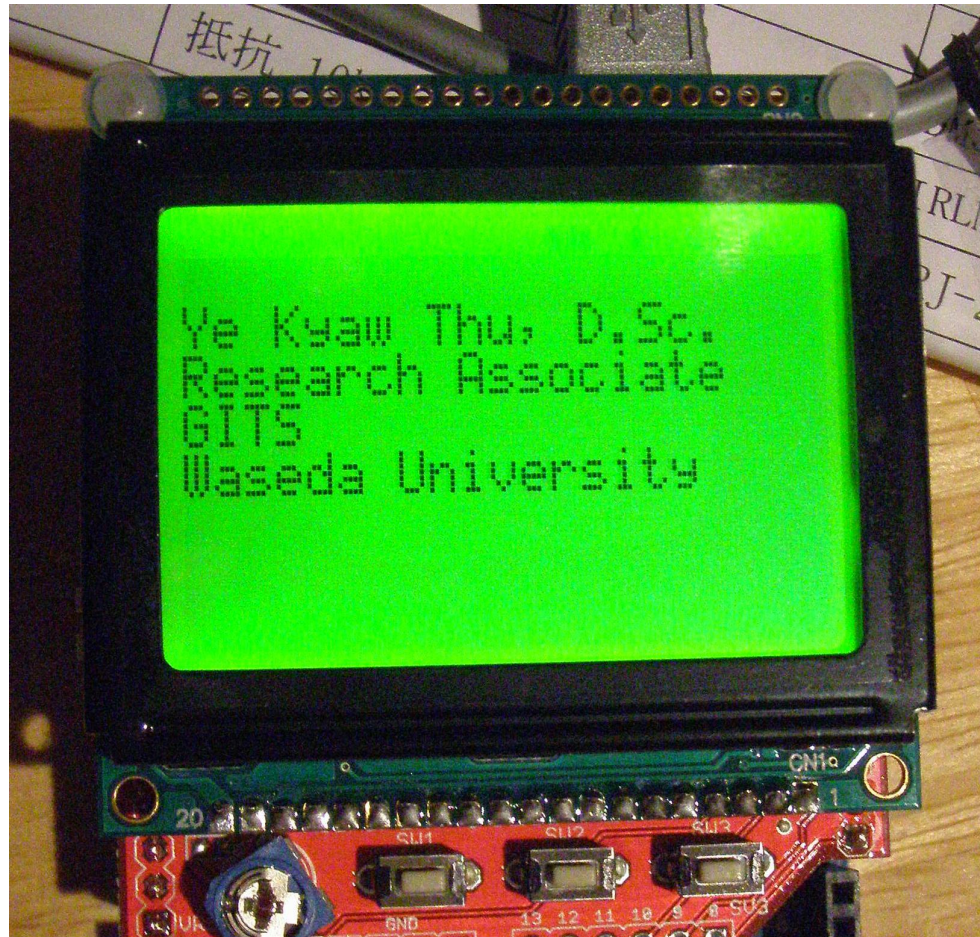

- Theoretically, low- and high-fidelity prototyping have their roles, and both of these techniques are useful for the product development life cycle. However, it is sometimes necessary to create a text input interface prototype rapidly to explore my new idea and provide visual and physical experiences that far exceed traditional paper prototyping. Are there any possible solutions?
- One is “prototyping with pictures and real mobile devices”.

GUI Prototypes for Your Models

- Introduction to PicMobi

GUI Prototypes for Your Models

- Sometimes, you might want to use hardware

Practical Introduction to yad & PyQt

Q&A
